Precision engineering

Fabriqué en aluminium premium

A minimalistic, modern design crafted out of a refined, premium silver anodised aluminium alloy that stylishly compliments computers and products such as iPads, Macs, iMacs, and MacBooks. Silver anodising is an electrochemical process that converts a metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Anodised aluminium is considered environmentally safe, producing few, if any, harmful effects on land, air, or water.

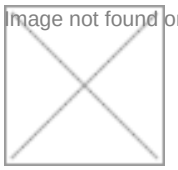

Fully adjustable design

The fully adjustable design of the stand allows for varying laptop thicknesses, ranging from 0.55 to 2.58 inches, catering for most Apple, Dell, HP and Samsung laptops. You can easily change the width to suit your device by adjusting the four screws on the bottom of the stand. For ultimate convenience, an Allen key is supplied within the packaging.

Superior, long-lasting build quality

The premium materials and strong construction of the stand provide a solid 0.51kg weight which enables its wide compatibility, making it suitable for most laptops. Featuring several built-in silicone rubber pads placed tactically on the top, the stand keeps your device securely in place, while also protecting its surface from scratches. Additional rubber covering the bottom of the stand ensures that it will stay securely fixed without leaving any residue when removed.
