Precision engineering

Crafted from premium aluminium

A minimalistic, modern design crafted out of a refined, premium silver anodised aluminium alloy that stylishly compliments computers and products such as Macs, iMacs, and MacBooks. Silver anodising is an electrochemical process that converts a metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Anodised aluminium is considered environmentally safe, producing few, if any, harmful effects on land, air, or water.

Compact desk management

Elevating your computer monitor or laptop off the desk allows you to free up valuable desk space. The elegant design will free up room on a cluttered desk, and a 28cm wide space directly below the stand allows you to store a small laptop, keyboard and mouse, tablet, smartphone, USB hub, paper, and other everyday office essentials.

Ergonomically designed

This product is ergonomically certified to improve posture and maintain long-lasting health; with the ability to achieve a sufficient viewing elevation that reduces strain on your back and neck. As outlined by The Chartered Institute of Ergonomics and Human Factors, back and neck pain, headaches, shoulder and arm pain are common computer-related injuries. Such muscle and joint problems can be caused or made worse by poor workstation (desk) design, bad posture and sitting for long periods of time.
