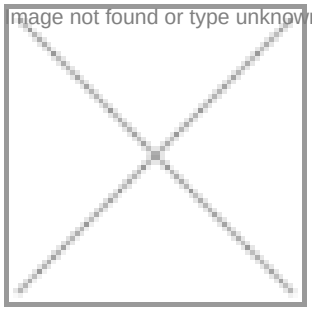
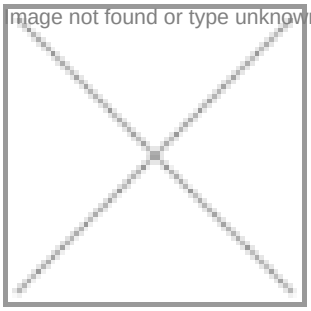
Precision engineering





Crafted from premium aluminium

A minimalistic, modern design crafted out of a refined, premium silver anodised aluminium alloy that stylishly compliments computers and products such as Macs, iMacs, and MacBooks. Silver anodising is an electrochemical process that converts a metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Anodised aluminium is considered environmentally safe, producing few, if any, harmful effects on land, air, or water.

Compact desk management

Elevating your computer monitor or laptop off the desk allows you to free up valuable desk space. The elegant design will free up room on a cluttered desk, and a 28cm wide space directly below the stand allows you to store a small laptop, keyboard and mouse, tablet, smartphone, USB hub, paper, and other everyday office essentials.

Ergonomically designed

This product is ergonomically certified to improve posture and maintain long-lasting health; with the ability to achieve a sufficient viewing elevation that reduces strain on your back and neck. As outlined by The Chartered Institute of Ergonomics and Human Factors, back and neck pain, headaches, shoulder and arm pain are common computer-related injuries. Such muscle and joint problems can be caused or made worse by poor workstation (desk) design, bad posture and sitting for long periods of time.

Product description

Perhaps you are the kind of person who desires perfection. Perhaps you long for an object that seamlessly integrates into your living space; with a kind of finish that allows your fingers to lightly brush over sleek, refined aluminium.

Perhaps you are also the kind of person who desires performance, which means you strive for results: both in fast data transfer speeds, and superior, long-lasting build quality.

And if you are - Then are you also the kind of person who, above all else, desires protection? Protection of your device, and protection of yourself...?

Then this - Is the Desire2 View My Screen At Home USB presented in sleek, refined aluminium.

With 4 USB ports to 3.0 certified standard (10 times faster than USB 2.0) providing fast data transfer, charging capability and additional easy to access ports, and an ergonomically designed elevation providing you ultimate viewing comfort with a compact space underneath for desk management, the Desire2 View My Screen At Home USB could be your ultimate object of desire.
